

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A prosthesis or orthosis for a member of a human body, comprising limb-forming components, which components are connected by pivoting couplings, ~~and~~ at least one first spring element whose ends are coupled with limb-forming components that are distinguishable from ~~each other~~ one another, wherein a coupling element is provided spanning at least two ~~of said~~ pivoting couplings, of a limb-forming component, and a second spring element is provided which is arranged to store energy released from the first spring element and to release energy for tensioning the first spring element.

Claim 2 (currently amended): A prosthesis or orthosis according to claim 1, wherein the member is a foot, and further comprising a lower leg portion, a heel portion, a front portion of the foot and a toe portion, wherein the front portion of the foot at either side ends in pivoting couplings comprising an ankle hinge and a toe hinge, respectively, for the coupling of firstly on the one hand the heel portion and the lower leg portion, and secondly on the other end the toe portion, and wherein the coupling element spans the pivoting couplings of the front portion of the foot.

Claim 3 (currently amended): A prosthesis or orthosis according to claim 2, wherein the coupling element is connected ~~on the one hand~~ with the toe portion and ~~on the other hand~~ with a selection made from the group consisting of the lower leg portion and the heel portion.

Claim 4 (currently amended): A prosthesis or orthosis according to claim 2 3, wherein the coupling element is connected ~~on the one hand~~ with the toe portion and ~~on the other hand~~ with the lower leg portion.

Claim 5 (original): A prosthesis or orthosis according to claim 4, wherein the front portion of the foot and the heel part are integrated to form a whole.

Claim 6 (original): A prosthesis or orthosis according to claim 1, wherein the coupling element is the first spring element.

Claim 7 (original): A prosthesis or orthosis according to claim 2 wherein the heel portion and the lower leg portion share the ankle hinge of the front portion of the foot, while also being mutually coupled via a second spring element.
